The Omnibus Trade and Competitiveness Act of August 23, 1988 changed the name of the National Bureau of Standards to the National Institute of Standards and Technology and expanded NIST's mission. Listings in this publication which have the prefix "NBS" were approved for publication before August, 1988. Those with the prefix "NIST" were approved after that date.

INTRODUCTION

The mission of the Center for Manufacturing Engineering (CME) is to bring the resources of the National Institute of Standards and Technology to bear on the standards and measurement problems associated with America's discrete parts manufacturing.

To fulfill this mission, CME conducts active programs of research in the areas of:

- o High precision dimensional measurement and precision engineering;
- o Robotics and intelligent machines;
- o Manufacturing data description, data administration, and information processing; and
- o Sensors for manufacturing processes.

In addition, CME provides technical support for joint industry committees which are developing voluntary standards for measurements, measurement techniques, and interfaces and maintains the national standards for length, force, and a number of subsidiary standards. It offers primary calibration services for these standards.

This list of publications reflects the diversity of scientific and technical problems which have been attacked over the past ten years in fulfillment of the Center's mission. Publications listed in this document which do not relate to CME's mission were written during the last ten years by members of the Center while employed in other areas of NIST. These publications, like those related to the Center's mission, reflect the wide background and knowledge base of members of the Center.

Papers, articles, and books appear in the list in alphabetical order by the last name of the first author. Each entry is keyed by the initial letters of the last name of this first author and is numbered in chronological order by publication date. Publications are also cross-referenced by their secondary authors.

This edition of the Publications of the Center for Manufacturing Engineering covers the period January, 1978 through December, 1988. It supersedes the previous edition and its supplements and includes the listings from all of them. Where updated publication data is available for a previous listing, the revised entry is marked (*) in this edition. A subject index follows the list of publications. Publications approved after December, 1988 are listed in a follow-on publication.

The interested reader can obtain copies of publications from commercial publications sources such as the National Technical Information Service, university or reference libraries, or from the individual authors by writing to them in care of the Center for Manufacturing Engineering.

NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY

BIBLIOGRAPHIC DATA SHEET

1. PUBLICATION OR REPORT NUMBER
NISTIR 89-4180
2. PERFORMING ORGANIZATION REPORT NUMBER

3. PUBLICATION DATE
SEPTEMBER 1989

4. TITLE AND SUBTITLE

Publications of the Center for Manufacturing Engineering
Covering The Period
January, 1978 - December, 1988

5. AUTHOR(S)

Dr. Philip Nanzetta, Asenath Weaver, Joan Wellington,
Linda Wood

6. PERFORMING ORGANIZATION (IF JOINT OR OTHER THAN NIST, SEE INSTRUCTIONS)

U.S. DEPARTMENT OF COMMERCE
NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY
GAIITHERSBURG, MD 20899

7. CONTRACT/GANT NUMBER

N/A

8. TYPE OF REPORT AND PERIOD COVERED
Bibliography 1/78 - 12/88

9. SPONSORING ORGANIZATION NAME AND COMPLETE ADDRESS (STREET, CITY, STATE, ZIP)

Center for Manufacturing Engineering
National Institute of Standards and Technology
Gaithersburg, MD 20899

10. SUPPLEMENTARY NOTES

DOCUMENT DESCRIBES A COMPUTER PROGRAM; SF-185, FIPS SOFTWARE SUMMARY, IS ATTACHED.

11. ABSTRACT (A 200-WORD OR LESS FACTUAL SUMMARY OF MOST SIGNIFICANT INFORMATION. IF DOCUMENT INCLUDES A SIGNIFICANT BIBLIOGRAPHY OR LITERATURE SURVEY, MENTION IT HERE.)

A list of publications by staff of the Center for Manufacturing Engineering for the period 1978-1988, indexed by subject area.

Publications cover research done by the Center in the areas of high precision dimensional measurement and precision engineering; robotics and intelligent machines; manufacturing data description, data administration, and information processing; and sensors for manufacturing processes.

12. KEY WORDS (6 TO 12 ENTRIES; ALPHABETICAL ORDER; CAPITALIZE ONLY PROPER NAMES; AND SEPARATE KEY WORDS BY SEMICOLONS)

automation, bibliography, engineering, manufacturing, manufacturing data, metrology, precision, publications, robotics

13. AVAILABILITY

FOR OFFICIAL DISTRIBUTION. DO NOT RELEASE TO NATIONAL TECHNICAL INFORMATION SERVICE (NTIS).

ORDER FROM SUPERINTENDENT OF DOCUMENTS, U.S. GOVERNMENT PRINTING OFFICE,
WASHINGTON, DC 20402.

ORDER FROM NATIONAL TECHNICAL INFORMATION SERVICE (NTIS), SPRINGFIELD, VA 22161.
